City Committee

The Property, Planning & Development Committee has completed the review of city by-laws & made their recommendations. Although we are disappointed that they did not consider our comprehensive recommendations they have at least dropped the previous "threshold" with regards to parking for cyclists.

The following are the Committee's recommendations on the Zoning By-law Review. Please note that these recommendations do not include the Downtown, which is to be reviewed separately. The by-laws will be reviewed by Public Works one year after they are accepted by Council. As our recommendations were very comprehensive we are fortunate that we are already prepared with our recommendations for that review.

- 19. That where automobile parking spaces are required as indicated in table "5-9: General Accessory Parking Requirements":
- A. Where ten (10) or more vehicle parking stalls are required, lockable bicycle parking shall be provided at a ten percent (10%) ratio to automobile parking, i.e. ten bicycle parking spaces per 100 automobile parking stalls.
- B. Required bicycle parking must be located with convenient access to major building entrances.
- 20. That the planning of long term bicycle parking be referred to the Winnipeg Public Service for the review of the Winnipeg Zoning By-law, one (1) year from the date of enactment of the by-law.

I have requested to meet with the Downtown Councilor's involved in the Downtown review & will again present our recommendations. These ideas will also be presented to the Downtown Biz members (Jan/08) in order to solicit their support & explain the details of what we are requesting.

Gareth, Mark & Anders continue to dedicate a great deal of time to the Active Transportation Advisory. Committee & are making solid progress. We continue to give ATAC our full ongoing support.
